Citation: Write Author's short names, for e.g. J. B. Smite, H. Brezis, Title: Write Your Article Full Title. Ann. Commun. Math. 9 (2026), 1. <https://doi.org/10.62072/acm.2026.0900X>

Abstract: Please type your abstract here. Abstracts of a research paper should be typically 200 to 400 words in length, and 150 to 300 words for a review paper. We encourage authors to use the following style of structured abstracts, but without headings, e.g., (1) Background: Outline the broader context of the research and specify the study's objective. (2) Methods: Describe the principal methods or procedures employed. (3) Results: Summarize the major findings. (4) Conclusions: State the key conclusions or interpretations drawn from the results. Abstracts shall not include reference citations. Abbreviations that appear only once in the abstract should be defined in full. If abbreviations appear more than once, the full definitions should be provided first before they can be used elsewhere.

Mathematics Subject Classification: 16U10, 16U80, 16U99, 16S34

Keywords: Keyword 1; keyword 2; keyword 3

1 Introduction

Please use the ACM template to prepare your manuscript, before you submit to our journal. Please read carefully the instructions for authors at <https://www.technoskypub.com> [2]. These are important instructions and explanations. Thank you for your cooperation.

2 Materials and methods

2.1 Subheading

2.1.1 Sub-subheading

The heading levels should not be more than 4 levels. The font of heading and subheadings should be 12 point normal Times New Roman. The first letter of headings and subheadings should be capitalized.

3 Results

The body text is in 12 point normal Times New Roman, the line space is at least 15 point.

4 Second section

This is the bodytext. This is the bodytext. This is the bodytext. This is the bodytext. This is the bodytext. This is the bodytext. This is the bodytext. This is the bodytext. This is the bodytext. This is the bodytext. This is the bodytext. This is the bodytext. This is the bodytext. This is the bodytext. This is the bodytext.

4.1 A subsection

This is the bodytext. This is the bodytext. This is the bodytext. This is the bodytext. This is the bodytext. This is the bodytext. This is the bodytext. This is the bodytext. This is the bodytext. This is the bodytext. This is the bodytext. This is the bodytext. This is the bodytext. This is the bodytext. This is the bodytext. This is the bodytext.

Figure 1: This is a wide figure. Schemes follow the same formatting. If there are multiple panels, they should be listed as: (a) Description of what is contained in the first panel. (b) Description of what is contained in the second panel. (c) Description of what is contained in the third panel. (d) Description of what is contained in the fourth panel. Figures should be placed in the main text near to the first time they are cited. A caption on a single line should be centered.

4.2 Another subsection

8 Conclusions

Summarize the main findings, highlight contributions, discuss limitations, and suggest possible future research directions.

Author Contributions: For papers authored by more than one individual, an Author Contributions section is required to explicitly state the distinct contributions made by each author. The roles should be assigned using the appropriate CRediT classification. Further details can be found in the CRediT taxonomy. For example; *Author1*: Conceptualization, Formal analysis, Methodology, Writing—Original Draft, Writing—Review and Editing, Visualization, Supervision, Software, Data curation, Project administration, Funding acquisition, Investigation, Results analysis, Resources. *Author2*: Conceptualization, Formal analysis, Methodology, Writing—Original Draft, Writing—Review and Editing, Visualization, Supervision, Software, Data curation, Project administration, Funding acquisition, Investigation, Results analysis, Resources. All authors have read and approved the final version of the manuscript for publication.

Acknowledgement: Acknowledgments (All sources of funding of the study must be disclosed if available) We would like to thank you for following the instructions above very closely in advance. It will definitely save us lot of time and expedite the process of your paper's publication.

Funding Statement: Please disclose all sources of funding that supported the study, providing grant identifiers, author initials of recipients, and links to funders (e.g., "This work was supported by [Funder], grant number xxx" or "APC supported by xxx"). Use standardized funder names as listed at <https://search.crossref.org/funding> to avoid indexing issues. If no external funding applies, write "The author(s) received no specific funding for this study."

Data Availability Statement: This section must specify how the data supporting the study can be accessed and justify any restrictions. Examples include:

1. Data publicly accessible in a repository.
"Data are available in [repository name] at [URL]."
2. Data included within the article or Supplementary Materials.
"Supporting data are provided within the article [and/or] Supplementary Materials."
3. Data obtainable from the corresponding author on request.
"Data are available from the corresponding author upon reasonable request."
4. Data restricted due to ethical, legal, or commercial reasons.
"Data are not publicly available due to restrictions related to this study."
5. "Not applicable."

Ethics Approval: Ethical approval statements should indicate whether human or animal subjects were involved, name the approving committee, specify applicable regulations or guidelines, and include any reference or approval number where relevant. For studies without such involvement, state "Not applicable."

Use of Generative-AI tools declaration: The authors declare that no Artificial Intelligence (AI) tools were used in the creation of this article.

Conflicts of Interest: The authors have no competing interests to disclose.

Supplementary Materials: (Optional) The supplementary material is available online at <https://www.techscience.com/doi/10.62072/acm.2026.0900X/s1>, Figure S1: caption; Table S1: caption; Video S1: caption.

Supplementary Materials should be uploaded separately on submission. Any file format is acceptable; however, we recommend that common, non-proprietary formats are used where possible. Supplementary materials should be clean,

without tracked changes, highlights, comments or line numbers. Supplementary figures must be clear and readable, and we recommend a minimum resolution of 300 dpi, figure legends must be clear and accurate. Supplementary materials must be mentioned in the main text. The citation format of Supplementary Figures, Tables, Equations, etc., should start with a prefix “S”, e.g., Fig. S1, Table S1, Eq. (S1), etc.
